**JUNIOR HERDING DOG TEST
COURSE DIAGRAM**

Note: this course may also be set up in an open field, by substituting two free-standing panels for the corner panels. These free-standing panels should be located approximately where the corner panels would be in an arena, and should be similar in size and form to the center panel.

The course is described as follows:

The stock are freestanding in the middle of the short side near the top of the arena, well off the fence. The dog may be brought in on lead, and the handler may gently guide the dog by the collar to a position within no less than 15 ft. of the stock before removing the lead. Off-lead, the dog must hold a stand, sit or down, then is released to gather and/or drive the stock. Throughout the course, the handler may take any position relative to the stock and dog and may move anywhere on the course, including through the obstacles. The handler may not touch the dog once the stock are set in motion.

The stock are taken through the panels. The handler may take the center panel either on the return from the corner panels or on the way to the corner panels (when negotiating the corner panels, the handler may choose to do either the right-hand or left-hand panel first). The stock are then taken to the pen. The dog is stopped, holding the stock in place, while the handler opens the gate to the pen. After the stock have entered, the handler must close the gate; the dog should remain outside the pen.

The judge must observe the handler and dog and may not physically assist the handler and dog, but may advise the handler on how best to encourage the dog to move the stock and how to maneuver around the course.

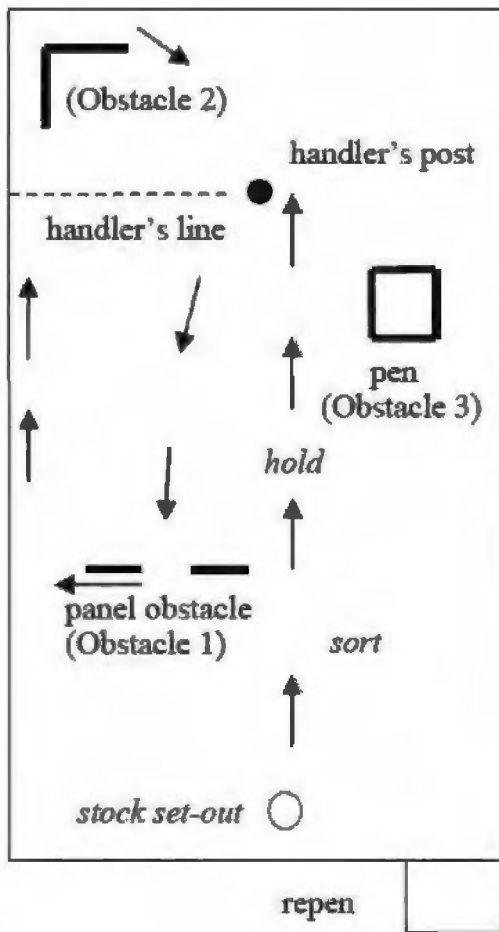

The dog must demonstrate its ability to collect and control stock, put stock in motion, move the stock in straight lines and turns, negotiate obstacles and come to a reliable stop at the pen. The stock must be taken through both corner panels and through the center obstacle to qualify.

Dogs are not to be allowed to rough up, trample or grip stock. Unruly dogs or dogs which attempt to attack the stock must be taken from the arena immediately. Dogs which are excessively fearful of the stock should be removed. Dogs showing lack of progress should be removed from the arena after five minutes.

Testing is completed and the handler may leash the dog as soon as the gate is closed.

Course time is 10 minutes.

HTAD COURSE #4

N
W + E The designations North, East, etc. are for purposes of description only.
S The course may be mirrored.

The stock set-out indicated on the diagram relates to courses that begin with a gather. The location of the take pen and/or repen may vary from the location for the repen shown on the diagram, so long as it is at the same end of the arena as shown. The handler's post is located 30 ft. from the North fence, in the center. A handler's line runs from the handler's post to the West fence parallel to the North fence. The panel obstacle is set 20 ft. from the West fence, at least 100 ft. from the handler's post; the opening is 12 ft. The L-shaped obstacle is located in the Northwest corner of the arena. Both sides of the obstacle are 10 ft. long with an aisle 4 ft. wide. The freestanding pen is located 30 ft. from the East fence and approximately one-third of the length of the arena from the North fence and should be 8-10 ft. on each side for sheep, 10-16 ft. on each side for cattle. (A trailer or a free-standing chute may be substituted for the pen.) The hold area is located approximately in the center of the arena. The area for sorts other than a gate sort is located approximately halfway between the hold area and the repen gate. For poultry, all dimensions are $\frac{1}{2}$ that of hooved stock.

1. Gather or Take pen

Gather: The stock are let out into the arena and allowed to settle, or may be set out in a specific location; the method used is to be consistent for all runs. In HTAD III, the handler remains at the post while the dog is sent from there to gather the stock. In HTAD II, the handler may leave the dog at the handler's post and move to a point approximately halfway between the post and the stock, then send the dog to gather the stock. In HTAD I, the handler may leave the dog at a point approximately halfway between the post and the stock and move to approximately 15 ft. from the stock, then send the dog to gather the stock. At all three levels the stock are brought to and around the handler's post, passing just to the East of the handler's post and then turning toward Obstacle 1. The gather ends when the stock have gone just past the handler's post.

Take pen: HTAD III handlers must remain outside the pen while the dog brings out the stock. HTAD II handlers may enter the pen with the dog but should not move the stock themselves. HTAD I handlers may

enter the pen and assist the dog in moving the stock. An exception is made for cattle, where the handler may go in and assist if necessary at any level. If the stock come out on their own volition without the handler or dog entering, there is no penalty. Once the gate to the take pen is opened, it may not be closed until the stock have exited. The stock are then taken to the point on the course where the handler's post is located for the drive. Scoring for the take pen ends when the stock have reached the handler's post. The course then proceeds as indicated in the description.

2. Drive

The stock are driven to Obstacle 1. HTAD III handlers must stay at handler's post. HTAD II handlers may go to a point halfway to Obstacle 1, then must remain there for the remainder of the drive. HTAD I handlers may accompany the stock up to Obstacle 1. The drive ends when the stock reach a point 10 ft. in front of Obstacle 1.

3. Obstacle 1

The stock are moved through the freestanding panels. The handlers remain at the designated locations while the stock are taken through the panels. While HTAD I handlers may go up to the panels, they should not precede the stock through the panels. Once the stock have cleared the obstacle, handlers are free to move. Once the stock have gone through the panels, they are turned toward the West side of the arena, then back toward the North side, toward Obstacle 2. Scoring for this section ends when the stock have been turned toward Obstacle 2 and have moved past the end of Obstacle 1 closest to the West side of the arena.

4. Obstacle 2

The stock should enter at the South opening of the obstacle and exit heading East. HTAD III handlers must remain South of the handler's line until the stock have exited. HTAD II handlers remain South of the handler's line until the stock have exited, or may choose to go directly to the entrance of the obstacle and remain in that location until the stock have exited. HTAD I handlers may move anywhere relative to the obstacle but may not enter it. Scoring ends when the animals have exited.

5. Obstacle 3

The stock are taken across the arena and put into the freestanding pen. Scoring for the pen ends when the gate is closed.

6. Hold

The animals are taken to the hold area. The stock is settled and briefly held in place. There is no required position for handler or dog. The judge signals the end of the hold/settle. HTAD I and II handlers then take the stock to the repen. HTAD III handlers proceed with the sort.

7. Sort

The sort is done by HTAD III handlers only. The stock is moved to the designated area, which depends on the type of sort being done. The sort may be one of the following: (a) Gate sort, (b) Ribbon-removal/shed. The sort ends when the gate is closed on the sorted animals, or when the ribbon has been removed/ animals have been shed.

8. Repen

The stock are taken to the repen and held a short distance off the gate while it is opened, and then are repenned. When a gate sort has been used, the animals that had been left out in the arena are repenned. The run ends when the repen gate is closed after the last animal has exited the arena.
