Course Description RLF at Rosehaeven June 2026

To get into position to start run, dog and handler enter empty large trial field, close gate, and proceed to handler post. At this point 25 sheep will enter the top of the large trial field.

Levels II and III-must remove leash after closing the gate and before proceeding to handler's post.

Level I may be positioned for start with leash attached, but must demonstrate a pause after the leash is removed before the dog is sent to gather the stock.

1. 10 pts - Gather – Sheep are gathered from west end of field and fetched down the north side of the field, then turn clockwise around the handler's post. Sheep should not pass through the freestanding panels on any part of the gather. When all sheep have passed clockwise around the post, the gather is complete.
 - a. III – must remain at the handlers post while the dog gathers the stock and they pass around the post.
 - b. II – Dog is set at the post, and handler may move half the distance to the sheep set out – point marked on fence.
 - c. I- dog may be placed at the halfway point marked on the fence. Handler may move to a point no closer than 15' from the sheep.
2. 20 pts. - Drive 1/Obstacle 1 – sheep move directly from the handler's post through the free-standing drive panel to the gate at the SW corner of the trial arena. Drive is complete when the sheep reach the SW gate of the trial arena.
 - a. III – handler remains at the handlers post until sheep reach the SW corner of the trial arena.
 - b. II – Handler remains at the handlers post until all sheep have passed the plane of the free-standing drive panels.
 - c. I – Handler may move with the sheep toward the drive panels, but may not pass the plane of the drive panels until all sheep have passed the plane.
3. 10 pts. - Obstacle 2 – sheep move through the NW PT gate, and then directly to north side of the drive panels standing mid-field in PT. They pass through the panels and proceed directly to the gate in the SW corner of the PT arena. Obstacle 2 is complete when sheep have negotiated the obstacle and reach the SW PT gate.
 - a. III – handler must remain at the NW gate of PT field until all sheep have passed the plane of the drive panels, at which time the handler may proceed to the SW PT gate.

- b. II – handler may travel along the west fenceline of the PT field as the sheep move toward the drive panels, but may not break the plane of the panels until all sheep have passed the plane. Then handler proceeds to the SW PT gate.
 - c. I – handler may move with the sheep, but must not break the plane of the panels until all sheep have passed the plane.
- 4. 10 pts. - Gate sort – at the SW PT gate, 10 head of sheep will be sorted from the large group and will enter the L pasture. Sort is complete when 10 sheep have entered the L pasture.
 - a. III – All 5 of the ribboned sheep and any other 5 sheep must be sorted into L pasture
 - b. II – at least 3 ribboned sheep and any other 7 sheep must be sorted into the L pasture
 - c. I – any 10 sheep must be sorted into the L pasture
- 5. 10 pts - Obstacle 3 – 10 head of sorted sheep will be gathered at the SW PT gate. They will proceed along the west side of the L pasture, turn counter clockwise around the 2 marked trees, and then return to the SW PT gate. Gate will be opened, and the 10 will rejoin the other 15 sheep in PT field.
 - a. III- Handler must remain at the SW PT gate.
 - b. II – Handler must remain along the west fenceline
 - c. I – Handler may move with the sheep, but should not lead the sheep around the trees.
- 6. 10/20 pts. – Take pen/Hold/ribbon pull – All 25 sheep will exit the pt gate into the Back L pasture, proceed along the south fence shared with PT, negotiate the right angle corner and proceed directly to the S gate of HT. All 25 sheep will enter HT where ribbon pull (hold for Level I) will take place.
 - a. III – Handler may not enter PT field as dog gathers sheep and brings them into L pasture. Gate is closed. Dog will hold the sheep at the SW PT gate until the handler reaches the HT gate. Sheep are brought from the hold location into HT arena. Ribbon pull from one of 5 marked sheep occurs in the center of the arena.
 - b. II – Handler may enter the PT field, but must remain just inside the gate while dog gathers the sheep and brings them into the L pasture. Gate is closed. Dog will hold the sheep at the SW PT gate until the handler reaches the SE corner of the PT field. Sheep are brought from the hold location into the HT arena. Ribbon pull from one of 5 marked sheep occurs in the center of the arena.
 - c. I – Sheep will move with the handler as he/she proceeds to HT gate. Hold occurs in the center of the HT arena.

7. 15 pts. Drive/Fetch/Wear to reopen – all 25 sheep will enter PT, proceed directly to NW PT gate, into large trial field, along west fenceline of large trial field, directly to reopen gate.
 - a. III– handler must remain at HT gate until sheep reach PT gate, must remain at PT gate until sheep reach reopen gate. Upon opening each gate, dog should control sheep movement so there are no escapes while the handler is closing the gate.
 - b. II – handler may move halfway between HT and PT gates until sheep reach PT gate, may move halfway between PT gate and reopen until sheep reach reopen gate. Upon opening each gate, dog should control sheep movement so there are no escapes while the handler is closing the gate.
 - c. I- handler may move with sheep. Upon opening the gate, dog should control sheep movement so there are no escapes while the handler in closing the gate.
8. 5 pts. Reopen – demonstrate hold off the gate before exhausting all 25 sheep

Good stockmanship is to be observed with sheep moving calmly and safely through all gates and obstacles.

Ties are broken by (1) best score on Obstacle 1/Drive 1, (2) then best score on Obstacle 3, (3) then best time.

Course time: 25 minutes
